

RUHA

Computer Science Engineering Student

ruhaeilaf33@gmail.com | 8971061652 | [LinkedIn](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science Engineering student with a 9.55/10 CGPA and strong foundation in Data Structures & Algorithms, Java, Python, SQL, Object-Oriented Programming, and full-stack development. Experienced in building AI-powered and web-based applications using React.js, Django, Flask, REST APIs, MySQL, and machine learning. Strong problem-solving and analytical skills with hands-on experience in developing scalable software solutions and working across frontend, backend, databases, and AI/ML components.

EDUCATION

SJB Institute of Technology, Bengaluru — B.E., Computer Science & Engineering 2023 – 2027
CGPA: 9.55/10

Saraswati P.U. College, Kumta — Pre-University (KSEAB) 2021 – 2023
Percentage: 94.66%

Mar Thoma Central School, Honnavar — CBSE (Class X) 2020 - 2021
Percentage: 88.4%

TECHNICAL & PRODUCT SKILLS

Programming: Java, Python, C, SQL, JavaScript

Web Development: React.js, Django, Flask, HTML5, CSS3

Backend & APIs: Django REST Framework, Flask REST APIs, REST API Development, JWT Authentication

Databases: MySQL, SQLite

AI/ML & Data: Machine Learning, Scikit-learn, Pandas, NumPy

Cloud: AWS, Google Cloud

Tools: Git, GitHub, VS Code, Jupyter Notebook, IntelliJ IDEA

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

MAPIS – Multilayer Adaptive Phishing Intelligence System

Tech Stack: Python, Flask, React.js, Scikit-learn, Random Forest, Pandas, NumPy, REST APIs

- Engineered an AI-powered phishing detection system using a multilayer analysis framework combining URL, website content, website behavior, and sender reputation.
- Trained a Random Forest classification model using engineered security features to distinguish phishing URLs from legitimate URLs.
- Developed a React.js frontend and Flask REST APIs to provide real-time phishing risk scores and classifications.
- Integrated machine-learning inference with the web application to deliver an end-to-end phishing detection workflow

Inventrax – AI-Powered Inventory & Business Management Platform

Tech Stack: React, Vite, Tailwind CSS, Recharts, Python, Django, Django REST Framework, MySQL, JWT, AI/ML Forecasting, Deterministic Decision Engine, AI Business Agent, Swagger/OpenAPI

- Developed a full-stack inventory and business management platform to centralize inventory, sales, purchasing, supplier, customer, and business workflows.
- Implemented modular application features and user workflows to streamline inventory management and business operations.
- Built dashboards and data-driven functionality to provide centralized visibility into business and inventory information.
- Integrated intelligent analysis/recommendation features where applicable to support data-driven inventory and business decisions.

StudySphere – AI-Powered Student Productivity Platform

Tech Stack: React.js, Django REST Framework, MySQL, Tailwind CSS, JWT Authentication

- Developed a full-stack student productivity platform integrating study planning, task management, notes, calendar scheduling, assignment tracking, placement tracking, DSA progress, and productivity analytics.
- Built secure REST APIs using Django REST Framework with JWT authentication and custom user management.
- Designed and implemented MySQL database integration, role-based access control, and modular application architecture.
- Developed interactive dashboards for personalized academic and productivity tracking.

CERTIFICATIONS

- NPTEL Certificate in Introduction to Industry 4.0 and Industrial Internet of Things — Elite, 82%
- NPTEL Certificate in AI in Human Resource Management — Elite, 86%
- Google Developer Groups (GDG) on Campus, SJBIT — Covered Google Cloud, Vertex AI, and Gemini-based application development

HACKATHONS & PARTICIPATIONS

- Django Semi Hackathon — SJB Institute of Technology
- Cyborg Technical Event — SJB Institute of Technology
