## PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong foundation in Java, Python, SQL, data structures, and software development. Experienced in building AI, IoT, and web-based applications through hands-on projects, with strong analytical, problem-solving, and collaborative skills. Passionate about developing scalable software solutions and continuously learning emerging technologies.

## EDUCATION

**SJB Institute of Technology, Bengaluru**, *Bachelor of Engineering in Computer Science & Engineering*

2023 – Present

CGPA: 9.55/10

**Saraswati P.U. College, Kumta**, *Pre-University (KSEAB)*

2023 – 2023

Percentage: 94.66%

**Mar Thoma Central School, Honnavar**, *CBSE (Class X)*

2021 – 2021

Percentage: 88.4%

## SKILLS

### Programming & Web

Python, Java, SQL, C, HTML, CSS, Django, Flask

### Databases & Tools

MySQL, SQLite, Git, GitHub, VS Code, Jupyter Notebook, IntelliJ IDEA

### Data Analytics

Pandas, NumPy, Scikit-learn, Tableau, Microsoft Excel

### Enterprise & Cloud

AWS

### Soft Skills

Teamwork, Communication, Collaboration, Problem Solving, Analytical Thinking

## PROJECTS

### MAPIS – Multilayer Adaptive Phishing Intelligence System

**Tech Stack:** Python, Flask, React.js, HTML5, CSS3, Scikit-learn, Random Forest, Pandas, NumPy, REST API, Git, GitHub

- Developed an AI-powered phishing detection system using a multilayer analysis framework.
- Combined URL analysis, content analysis, website behavior analysis, and sender reputation analysis for accurate threat detection.
- Trained a Random Forest model to classify phishing and legitimate URLs using engineered security features.
- Built a React-based interface with Flask REST APIs to deliver real-time phishing risk scores and classifications.

### Campus Events Portal

**Tech Stack:** Python, Django, HTML5, CSS3, Bootstrap, JavaScript, AJAX, SQLite, OpenCV, ReportLab

- Created a web-based portal for campus event registration and administration.
- Enabled secure user authentication with a dedicated admin dashboard.
- Streamlined event scheduling and participant management through a centralized platform.

### Smart Retail AI

**Tech Stack:** Python, Pandas, NumPy, Machine Learning

- Built an AI-powered retail analytics system to predict product demand and optimize inventory management.
- Analyzed customer purchase patterns to generate actionable business insights.
- Improved inventory planning and business decision-making using predictive analytics and demand forecasting.

### IoT-Based Smart Health Monitoring System

**Tech Stack:** ESP32, IoT, Blynk

- Built a real-time health monitoring system to track heart rate and body temperature.
- Enabled remote patient monitoring with instant IoT-based alerts.
- Improved emergency response through continuous health monitoring.

## CERTIFICATIONS

### NPTEL Certificate in Introduction To Industry 4.0 And Industrial Internet Of Things

Elite : 82%

### NPTEL Certificate in AI in Human Resource Management

Elite : 86%

## HACKATHONS & PARTICIPATIONS

**DjangoSemi Hackathon**, *SJB Institute of Technology*

**Cyborg Technical Event**, *SJB Institute of Technology*

## RELEVANT COURSEWORK

- Data Structures & Algorithms
- DBMS
- Object Oriented Programming
- Operating Systems
- Computer Networks
- Artificial Intelligence
- Machine Learning

## PROFESSIONAL DEVELOPMENT

Dedicated to continuous learning and enhancing technical expertise through hands-on projects, real-world problem solving, collaborative development, and a commitment to delivering high-quality software solutions.
